

# "Green-up" your assembly operation, improve the consistency and quality of your parts with the Promess EMAP, our electro-mechanical assembly press

EMAP

Reduce the footprint (floor space) of your operation by 75 percent over a traditional hydraulic press with EMAP.

Eliminate hazardous oily shop floors; no more slip and fall; no more absorbent socks around your machines; no more storage or waste removal problems.

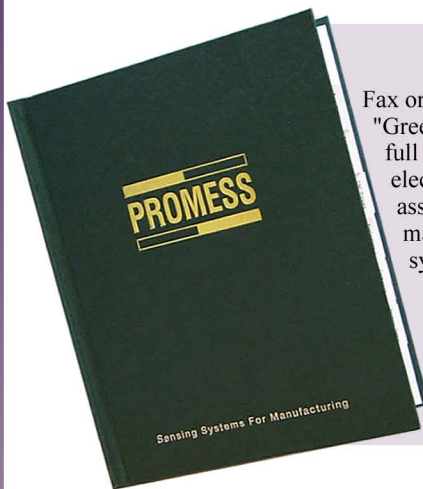

Assemble with unprecedented consistency in close tolerance manufacturing; EMAP's turnkey package allows you to assemble and gage at the same time.

Save money by cutting heat, noise and energy use in half; reduce maintenance by 95 percent. We'll save you 35 percent of your total operating costs in 12 months.

## Visit our facilities and we'll show you the ease of assembling your production or prototype parts . . . and provide you detailed assembly documentation!

### Green Book

Fax or E-mail us for the current version of the Promess "Green Book," a hard-bound publication that includes a full description of the environmental advantages of our electro-mechanical solution to pressing parts in an assembly operation. Plus "white papers" on cloning in manufacturing, retrofitting of assembly monitoring systems, and more.
