

LIGHTWEIGHT ROBOT PRESS

*Designed to mount
directly to a robot arm

The Robot Press incorporates Promess' EMAP technology with a lightweight housing and hardened end cap, making this package ideal for any robotic application needs.

The Robot Press line comes complete with the ability to mount directly to the robot with a simple adapter plate. This eliminates the need for expensive and bulky tooling which is typically involved when mounting press systems to robots.

LIGHTWEIGHT PRESS INCLUDES

- Fully programmable axes of motion
- Integrated force transducer
- Promess Controller with Windows based software
- All requires drives, electronics, and cables
- Integrated Backstop motor mounting packages
- Mounting block for easy robot installation

OPTIONS

- Additional load cell ranges
- Additional stroke lengths
- Single cable feedback
- Absolute encoder
