

JOIN PROMESS AND 200+ EXHIBITORS AT THE ASSEMBLY SHOW

FIND SOLUTIONS TO IMPROVE YOUR PROCESSES

Promess is a technology company that is passionate about giving machines feeling. We specialize in Motion Control Systems that have force and torque feedback. Some typical applications include: pressing, assembly, torque and fatigue testing, or other in-production processes that involve monitoring of multiple sensors. We have an expert application engineering team that is ready to answer your applications questions and find the right product fit for your process. We solve a wide range of problems related to cycle time reduction, the quality of your parts, downtime, and many other manufacturing headaches.
