

# INDEX TABLE WORK STATION

Simple add-on designed to add part loading and indexing capabilities to any Promess Work Station.

The Index Table Work Station facilitates seamless machine tending (robotic loading & unloading) and manual loading & unloading, for the greatest productivity and throughput. This Work Station cuts back on production down time while still delivering the highest quality, assembled & tested products, complete with data collection for verification and process validation. Featuring a load bearing design, the Index Table is capable of various rotation speeds to fit a wide range of applications, including heavier part assemblies.

*Implement continuous operation on a Promess Work Station*

## FEATURES AND BENEFITS

- + Distributed intelligence allows for easy seamless integrations
- + Load-bearing design matches up with Promess EMAP presses
- + Simple programmability and interface
